# IT'S OUR PLEASURE TO WELCOME YOU TO A COMPANY BUILT ON INNOVATION AND TRUST

Welcome to Regional  
Construction Contracting (RCC)  
where solar innovation powers a  
brighter future. We deliver  
premium off-grid and hybrid  
energy solutions designed to give  
homes and businesses across  
Jordan clean, reliable, and  
unstoppable power.

# OUR HISTORY

- Established in 2019 with a vision to transform Jordan's solar energy sector.
- Class A certified by the Energy and Minerals Regulatory Commission, reflecting our commitment to excellence.
- Providing advanced off-grid and hybrid solar solutions for residential, commercial, and industrial clients.
- Leading the execution of large, innovative solar projects using cutting-edge, sustainable technologies.
- Awarded a patent in 2025 for our Smart Energy Storage System, setting a new benchmark in efficient and sustainable energy management.

# FOUNDER & GENERAL MANAGER

## ENG . AMMAR ALOTOUM

1. Holds a Bachelor's degree in Chemical Energy Engineering from Jordan University of Science and Technology .
2. Holds a Master's degree in Electrical Engineering (Energy and Control) from Jordan University of Science and Technology.

# VISION & MISSION

## VISION

We aim to be the leading provider of smart, sustainable solar energy solutions in Jordan and the Middle East, leveraging innovation and advanced technology to drive the transition to renewable energy and create a cleaner, more sustainable future

## MISSION

Our mission is to provide reliable and innovative solar energy solutions through advanced technology and sustainable practices, ensuring customer satisfaction and a greener future.

# OUR JOURNEY OF INNOVATION

Since its founding in 2019, Regional Construction Contracting (RCC) has rapidly emerged as a regional leader in solar energy, delivering groundbreaking projects that set new industry standards in Jordan and across the Middle East. Holding a Class A license from the Energy and Minerals Regulatory Commission and a 2025 patent for our revolutionary Smart Energy Storage System, RCC continues to push the boundaries of innovation, excellence, and sustainable energy solutions—shaping the future of renewable energy for generations to come.

# WHAT DO YOU KNOW ABOUT US?

We are a team of engineers and energy specialists committed to advancing solar technology in Jordan.

Our work focuses on designing and implementing efficient off-grid and hybrid systems that ensure energy independence, reliability, and sustainability for every client.

**CONTINUE**

# OUR GOALS

- Promote Renewable Energy: Encourage the adoption of clean, sustainable solar energy across Jordan.
- Deliver Reliable Solutions: Provide high-quality off-grid and hybrid systems that ensure energy independence and efficiency.
- Innovate Continuously: Implement the latest technologies and smart solutions to meet evolving energy needs.
- Support Communities: Empower homes, businesses, and industries with accessible and cost-effective solar energy.
- Sustainability & Growth: Minimize environmental impact while expanding our footprint in the renewable energy sector.

# OUR COMPANY PREMIUM SERVICE

## Comprehensive Solar Solutions:

We provide complete off-grid and hybrid solar system design and installation, integrating advanced energy storage, electrical, and mechanical works to ensure maximum performance and reliability.

## Professional Support & Optimization:

Our team offers full operation, maintenance, and monitoring services, guaranteeing system efficiency, long-term durability, and continuous energy optimization.

# WHY CHOOSE US ?

- Committed to Excellence
- Customer First
- Innovative Solutions
- Experienced Team
- Fully Reliable
- Tailored Services
- Proven Track Record
